CORRESPONDENCE CONTROL **ROCKY FLATS PROJECT OFFICE**
10808 HIGHWAY 93, UNIT A
GOLDEN, COLORADO 80403-8200

MAX 0 9 2005

Mr. Steven H. Gunderson
Rocky Flats Cleanup Agreement Project Coordinator
Colorado Department of Public Health and Environment
4300 Cherry Creek Drive South
Denver, Colorado 80246-1530

Dear Mr. Gunderson:

Provided for your review and approval is the enclosed Pre-demolition Survey Report for Buildings B-450 (DWF-019-05). This report characterizes the physical, chemical and radiological hazards associated with the facility, summarizes the characterization activities, defines the Data Quality Objectives developed for this characterization, and presents the data quality assessment, verification and validation of results.

PDS results indicate that radiological contaminants exist in excess of the PDSP unrestricted release limits, and fixatives have been applied to immobilize loose radiological and beryllium contamination. Therefore, the entire building will be managed as LLW-PCB Bulk Product Waste during demolition. RCRA hazardous waste items have been removed from the building. Asbestos abatement was not required.

Based upon these Pre-Demolition Survey Reports (PDSRs) and subject to concurrence by the Colorado Department of Public Health and Environment, Building 450 is a Rocky Flats Cleanup Agreement Type 2 Facility pursuant to the Rocky Flats Environmental Technology Site Decommissioning Program Plan (DPP; K-H, 1999) and is ready for demolition.

Questions may be directed to Gary Morgan, Rocky Flats Project Management, at (303) 966-6003.

Sincerely,

Joseph A. Legare, Director
RFPO Project Management

TRANSMITTAL OF THE BUILDING 450 - PRE-DEMOLITION SURVEY REPORT (PDSR)
DWF-019-05

Provided for your review and approval is the enclosed subject report for the 450 facility. This report characterizes the physical, chemical and radiological hazards associated with this facility, summarizes the characterization activities, defines the Data Quality Objectives developed for this characterization, and presents the data quality assessment, verification and validation of results.

PDS results indicate that radiological contaminants exist in excess of the PDSP unrestricted release limits, and fixatives were used to immobilize loose radiological and beryllium contamination. Therefore, the entire building will be managed as LLW-PCB Bulk Product Waste during demolition. RCRA hazardous waste items have been removed from the building. Asbestos abatement was not required.

Based upon this PDSR and subject to concurrence by the CDPHE, this facility is acceptable for demolition. Please notify Kaiser-Hill when you transmit this document to CDPHE. If you have any questions, do not hesitate to call me or Duane Parsons at extension 6458.

Dennis W. Ferrera
